Sacramento, CA 95814

Dear Executive Director Snow:

I urge you to create a fourth alternative plan for California's water.

- Conservation *has* to be at the top of the list if mankind is to survive.
- There should be economic incentives to encourage more efficient water use, which some farms are already proving it can be done.
- Watersheds should be restored and protected.
- What rivers and wetlands we have left should be restored, protected and cherished.

The only construction I'm comfortable with is enlarging Shasta Dam. It doesn't appear that much will be harmed by that, as compared to building a whole new dam somewhere else.

Please enter these comments into the formal record for your Draft Programmatic Environmental Impact Report and Statement.

Sincerely,

  
Joanne Bretney
